MICHIGAN SUPREME COURT CLERK
P.O. BOX 30052
LANSING, MICHIGAN 48909

Dear Honorable Supreme Court Clerk:

REGARDING PROPOSED COURT RULE NO. 2003-47

The United States Constitution as well as the Michigan Constitution, makes it clear that judges are not to make the law, rather to interpret the law. By changing the law, the Michigan Supreme Court would deny Michigan asbestos disease victims their right to a jury trial. I am one of the Asbestos victims who is to have a jury trial in January.

Is the Asbestos industry and big business being used as tools for the Michigan and Michigan Supreme Court by denying the working people their constitutional right to jury trial after they have been harmed by corporate misconduct? I don't believe our United States Constitution and the Michigan Supreme Court would deny the working people who have had their health harmed because of their work in the past just shelved. Our United States Constitution and the Michigan Supreme Court should stand behind those who have worked and made us a great nation.

Very truly yours,

Joseph J. Mraulak

JJM/emmm
